# Characteristics

## Maximum exclusivity and modernity

The ATTICA screen represents the zenith in terms of SYSTEMPOOL's design and engineering, and is unique in its class on the market.

## New frontier of design and innovation

Redefine the limits of what we know creating new standards in the market. It is the essence of the work carried out at SYSTEMPOOL.

## Invisible technology, shape purity

Advanced technical solutions are built into pieces with an undisputed visual quality. "Aesthetic technology" is present in every detail of the ATTICA screen.

8mm tempered glass

As with other SP enclosures, the glass used for the ATTICA collection complies with the EN-12150 standard on safety glass.

System-Glass

Exclusive SP system by which water runs quickly throughout the glass surface, extending its clean and bright appearance. It reduces lime, soap foam, and bacteria deposits.

Zamak decorative hinges

SP uses the Zamak alloy to make the ATTICA hinges. This lets us offer a design with great personality and, in addition, a chrome finish with excellent quality and resistance.

Concealed offsetting system

Through this exclusive innovation, SP ensures a high versatility level without compromising the refined look of the ATTICA screen.

Hinges with lifting and positioning system

ATTICA hinges incorporate a concealed lift system that makes the smooth door closing easier, as well as a precise water tightness of the lower part of the door on the shower tray.

Decorative wall anchors

All ATTICA screen anchors feature chrome trims that conceal the wall brackets. This way we obtain a refined and innovative look.

Offsetting for walls that are not in line with the vertical

The specific side profiles can compensate for any irregularities in the walls during installation. Their special design ensures that the shower enclosures fit perfectly without affecting their visual appearance.

Premium height 2 m

SP screens stand out above others. Their slim and slender look, thanks to a maximized height, is also a plus in comfort much appreciated by taller people.
