PORCELANOSA Grupo

pro-skirting

Success in the design and installation of ceramic floors is in the small details. The ceramic tile is the most important element, but there are some complements such as tile spacers, grouts and skirting boards that really help to create stylish environments.

Butech expands the pro-skirting range by providing solutions for all types of tile flooring. Besides the existing silver, black and white options, new customized skirting boards can be produced with the same finish of any PORCELANOSA Group tile collection.
